

BUSINESS METHOD FOR ON-DEMAND PRODUCT MANUFACTURING AND FULFILLMENT SYSTEM

ABSTRACT

A method for earning money by web-based on-demand product manufacturing and fulfillment. The method includes hosting a website having products available for purchase. User input indicating selection of at least one of the products is received. A price for the selected product is calculated and payment information is requested from the user. Payment information is received from the user. The product is manufactured and prepared for shipping to the customer. The method is performed without human intervention.
